Under Walker, Wisconsin is 33,800 jobs short of matching the national pace of job creation

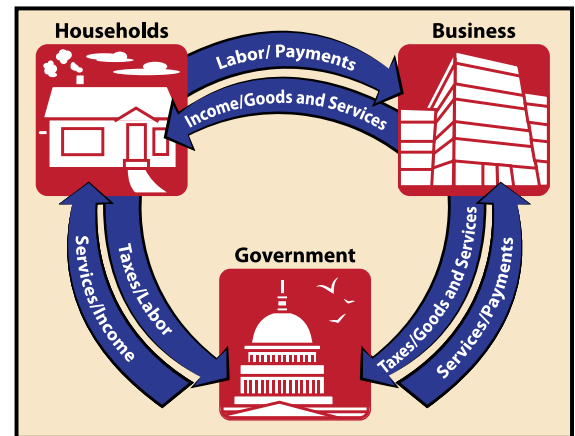

The chart shows the percent change in the number of jobs in Wisconsin and the U.S. since April 2011. The pink area is when Gov. Walker's budget has been law. If only we'd matched the US trend, we'd have 33,800 more jobs.

Cutting is the worst choice

Money circulating throughout the economy—cycling among businesses, households and governments— makes for prosperity.

But when huge amounts of money are taken out of the economy, as Gov. Walker's policies are doing, it hurts almost everyone. Businesses have fewer customers; workers have fewer jobs; state and local governments have less tax revenue.

In tough times, the worst thing a governor can do is further shrink the economy.

Four ways Walker's policies hurt Wisconsin's economy

- 1** The 2011-'13 state budget cuts about one billion dollars each year from education, health care and other basic services.
- 2** The state budget also slices household incomes through higher taxes on low-income families, higher college tuition and delayed unemployment benefits.
- 3** Act 10—passed in Special Session—hobbled collective bargaining and undermined the right of workers to have unions. It also takes over \$700 million-a-year out of the state's economy, by making massive cuts in public workers' take-home pay.
- 4** Federal funds that could have been used in Wisconsin were either rejected outright or lost because the programs they were to help fund have been slashed.
